

Chadi Boudaher

Halba, Lebanon | +961 76 332 016 | [Email](#) | [LinkedIn](#) | [GitHub](#)

Master's student focused on AI/ML Engineering with hands-on experience in Python, PyTorch, FastAPI, Machine Learning, and Deep Learning.

Education

Lebanese International University, Tripoli, Lebanon

September 2025 – Present

Master of Science in Computer and Communications Engineering

Cumulative GPA: 3.94/4.00

Lebanese International University, Tripoli, Lebanon

October 2022 – February 2025

Bachelor of Science in Computer Engineering

Cumulative GPA: 3.86/4.00

Honors: Graduated with Distinction; named to LIU's Honor List multiple times

Relevant Coursework: Machine Learning, Deep Learning, Database Systems, Data Structures and Algorithms.

Technical Skills

Programming: Python, Java, C++, JavaScript, SQL

Machine Learning / AI: PyTorch, Scikit-learn, OpenCV, Sequence Models

Data Analysis: NumPy, Pandas, Matplotlib

Backend: FastAPI, REST APIs, SQLAlchemy

Databases: PostgreSQL, MySQL

Tools: Git, GitHub, Docker, Linux, FFmpeg

Projects

Audio-Visual Corpus Builder

July 2026 – Present

Python, PyTorch, OpenCV, FFmpeg, TalkNet

- Developing an **audio-visual corpus generation pipeline** for building datasets suitable for visual speech recognition and related AI research.
- Implementing **face detection/tracking, speech detection, and audio-video preprocessing** using Python, OpenCV, and FFmpeg.
- Integrating **TalkNet with PyTorch** for active speaker detection to identify and temporally align visible speakers with speech segments in video.

CodeRooms API

July – August 2026

FastAPI, PostgreSQL, SQLAlchemy, WebSockets, JWT, Render

- Built and deployed a **FastAPI backend** with JWT authentication, PostgreSQL, room creation, and invite-based access.
- Designed **role-based permissions and authorization logic** to manage room access, moderation, and ownership.
- Developed authenticated **WebSocket chat** with persistent messages, live broadcasting, and cursor-based pagination.
